Education

Institute of Aeronautical Engineering <i>Bachelor of Engineering – Computer Science and Engineering; GPA: 7.81</i>	Hyderabad, India <i>September 2024 – May 2028</i>
Telangana State Board of Intermediate Education <i>Telangana Open School Society – MPC; Marks Gained: 384/500</i>	Medak, India <i>Aug 2023 – Aug 2024</i>
MJPTBCWRIES School <i>Secondary School of Education – CGPA: 10.0</i>	Medak, India <i>June 2015 - April 2021</i>

Work Experience

Bharath Heavy Electricals Limited <i>Backend Developer</i>	May 2026 – July 2026 <i>Python, Fullstack, MERN, MS Excel, MS Word</i>
- Implemented a College Faculty Booking System using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB to automate faculty facility reservations, reducing manual booking errors by 40% and improving scheduling efficiency. - Developed a complete backend architecture with RESTful APIs for user authentication, faculty booking management, admin approval workflows, and automated booking ID generation, ensuring secure and reliable data handling. - Maintained good documentation and presented using PowerPoint; used MS Excel for table creation and data sheets.	

AI Labs <i>Forward Development Engineering Intern</i>	Aug 2026 <i>Python, Azure, AIML</i>
- Designed and implemented a GenAI-powered insights platform leveraging Retrieval-Augmented Generation (RAG) and Text2SQL pipelines with Claude and GPT APIs to automate data exploration. - Optimized semantic search by migrating from AWS OpenSearch to Neo4j GraphDB, achieving a 40% performance improvement in query latency and response accuracy. - Developed front-end components using React.js with a Serverless Architecture and backend APIs via AWS Lambda, API Gateway, and Snowflake Unistore, improving scalability and reducing infrastructure overhead.	

Projects

REMEDY-XI <i>Python, FastAPI, React, Google Cloud Run, Firebase, ML Models, XAI</i>	Blog
- Built a proactive Minimal Intervention system using a serverless, event-driven microservices architecture on Google Cloud Run, combining Computer Vision and Multi-Agent AI to predict stampedes before risk occurs. - Engineered Intervention Services using a Recommendation model and a Prediction model to analyze the optimal solution and dependency graph from a live failures feed, outputting structured metrics to Google Cloud Storage. - Orchestrated a Multi-Agent pipeline using Google ADK with parallel agents for ML stats analysis and real-time news context gathering, feeding a Gemini-powered risk prediction and system alert agent.	

Skills Summary

Languages:	C, Java, Python, C++, JavaScript, MySQL
ML & AI:	MLflow, AutoML
Cloud & DevOps:	Azure Fundamentals
Frameworks:	React.js, FastAPI, Node.js
Data & Databases:	MongoDB, MySQL, REST APIs
Courses:	OS & DBMS, Data Structures, Algorithms, OOP, Time Series, AWS

Achievements and Additional Information

- Secured top 10 in AIVantage Ideathon Challenge.
- Mentee at Amazon ML Summer School 2026, where 3,000 students were screened out of 20,000 applicants.
- Continuous participation in Hackathons; qualified for 4th round in Adobe University Hackathon.
- Campus Ambassador and Backup Speaker at IDC, where 184 were recommended from 10,000 students from Hack With Infy.
- Co-President of Consortium National Wide (CSE) Club, IARE.
