

Sherla Srivastava

Freelance full-stack and AI developer

I build full-stack applications, backend systems, and intelligent AI solutions. Explore my work on [GitHub](#), connect with me on [LinkedIn](#), or review my professional background in my resume.

Services

Full-stack web development

End-to-end web applications, from a clean React interface to a secure backend and database. Booking systems, dashboards, admin panels, and business tools that are fast and easy to maintain.

React.js, Node.js, Express.js, MongoDB

Backend and API development

Reliable REST APIs and server-side systems that handle authentication, approval workflows, and data safely. Ideal as the backend for a web or mobile app, or to replace a manual process.

Node.js, FastAPI, Python, MySQL, MongoDB

AI and GenAI solutions

Practical AI that saves time: chat with your own data using RAG and Text2SQL, smarter semantic search, and multi-agent workflows built with models like Claude, GPT, and Gemini.

RAG, Text2SQL, Neo4j, Multi-agent systems

Cloud and serverless deployment

Scalable, cost-efficient deployments so your product runs reliably without heavy infrastructure to manage.

AWS Lambda, API Gateway, Google Cloud Run, Azure, Firebase

Have a project in mind?

Tell me what you want to build, and I'll help you plan it and ship it.
